WATER, AIR AND SOIL POLLUTION

Cumulative Key Word & Author Index

Volumes 109–116 (1999)

KEY WORD INDEX – VOLUMES 109–116 (1999)

A
abatement **111**, 57
abundance **116**, 639
Acacia confusa **111**, 29
acari **109**, 407
accumulation **109**, 277; **110**, 119
acid deposition **113**, 395; **114**, 137; **116**, 5
acidic deposition **110**, 255; **112**, 407; **116**, 267
acid drainage **111**, 57
acidification **109**, 17; **111**, 89; **112**, 85, 217; **116**, 65, 479
acidification trends **114**, 395
acid-precipitation **110**, 215
acid rain **114**, 121
activated sludge process **110**, 379
adenoviruses **114**, 85
Adirondack mountains **112**, 407
Adirondack region **111**, 19
adsorption **109**, 303; **111**, 75; **111**, 225; **113**, 115, 319; **114**, 155
  isotherms **113**, 371
  kinetics **113**, 371
aeration **112**, 315
aerodynamic **115**, 83
aerosol **112**, 247, 349; **113**, 175
aerosol-sulfate **112**, 171
agricultural **111**, 109
  activities **114**, 323
  production **116**, 621
Ailanthus altissima Desf. **116**, 267
air **115**, 183
  emissions **112**, 315
  quality **116**, 151
  pollutants **115**, 309
  pollution **112**, 107, 241; **116**, 377
  quality **115**, 195
alkaline **109**, 407
alkalinity **110**, 255
allozyme **116**, 395
alluvial aquifer **112**, 365
aluminium **110**, 81; **114**, 121, 137; **116**, 75
  depletion **109**, 101
  stress **109**, 53
Amazonia **112**, 297
ambient air **112**, 279
amendments **115**, 395
Ames test **114**, 67
ammonia **112**, 229; **113**, 175; **116**, 47
ammonium **115**, 547; **116**, 47, 121
ammonium sulphate **116**, 111
analysis **111**, 287; **112**, 41
anions **112**, 55
anthropogenic sources **111**, 377
antioxidants **116**, 249, 279
AOT40 **116**, 323
application technique **115**, 195
aquatic moss **109**, 41
aquatic pollution **114**, 287
Arcachon Lagoon **114**, 95
arid-zone soils **114**, 221
arsenate mobility **114**, 185
arsenic **109**, 41; **112**, 133; **113**, 127
ascorbate **116**, 249
ascorbic acid **116**, 377
aspen **116**, 311
assimilation rate **116**, 323
atmosphere **110**, 405; **116**, 597
atmospheric
  deposition **110**, 103; **113**, 273; **116**, 75
  fate **115**, 5, 257
  fluxes **114**, 95
  lifetimes **115**, 219
  pollutants **109**, 137; **113**, 1
  pollution **109**, 313
  transport **115**, 5, 21, 115, 167, 245
atomic absorption spectroscopy **111**, 235
atomic fluorescence **111**, 287
atrazine **115**, 371
authorisation **115**, 183
autocorrelation **110**, 17
automobile **115**, 411
autumn leaf discoloration **116**, 323

B
background **115**, 445
background level **111**, 235
bacteria **109**, 263
Bangladesh **115**, 347

base cations **111**, 89; **116**, 479
base saturation **110**, 255
BC/Al ratio **116**, 65
beech **116**, 299
Belarus **110**, 35
benzene **115**, 309
best linear unbiased estimation **110**, 215
best linear unbiased prediction **110**, 215
bio-accumulation **111**, 317; **114**, 303; **115**, 535
bioassays **110**, 157
biochemical oxygen demand **113**, 133
biodegradation **109**, 343; **111**, 1
biodiversity **116**, 351
biogas residual slurry **113**, 371
bioindication **116**, 377
bioindicator **109**, 41; **116**, 261, 267
biomass **114**, 13; **116**, 323, 639
biomass allocation **116**, 235
biomass production and elemental uptake **115**, 481
biomonitoring indices **114**, 339
bioremediation **110**, 157
biotic and abiotic interactions **116**, 151
biotreatment **116**, 501
bioturbation **109**, 277
black cherry **116**, 261
bloedite **109**, 313
blue spruce **116**, 429
bootstrapping **114**, 27
boron **111**, 271; **116**, 383
bottled water **113**, 217
branching order **116**, 365
Brazil **110**, 67
breakthrough curves **109**, 207
bromide **116**, 479
brown trout **112**, 85

C
^{137}Cs **110**, 171
cadmium **109**, 163, 277; **111**, 201; **111**, 225; **112**, 163; **114**, 171; **116**, 523
calcium **110**, 421; **112**, 85; **116**, 461
  and signal transduction **116**, 279
  -aluminum ratio **109**, 53
Canadian Shield Lake **114**, 303
canola meal **114**, 251
canonical discriminant analysis **111**, 19
canopy resistance **113**, 357
carbon dioxide **116**, 299, 311
  monoxide **112**, 107
carotenoid **116**, 333
carp **115**, 363
car traffic **109**, 147
catchment hydrology **113**, 97
cation **109**, 179; **112**, 55
Cd **112**, 187; **114**, 95
Cd-binding **112**, 187
Cd XP interaction **112**, 163
cement dust **114**, 13
Cesium-134 **114**, 303
charcoal **113**, 43
chelating agents **109**, 219
chemical analysis **112**, 279
chemical composition **112**, 55
Chernobyl **110**, 35; **110**, 171; **114**, 277
chicory **109**, 397
China **112**, 21
chloroform **115**, 309
chlorophyll fluorescence **116**, 323
chlorophylls **110**, 119; **116**, 333
chromium **109**, 41; **113**, 33; **116**, 523
chromosome **116**, 423
chromium resistance **109**, 263
chronic toxicity **111**, 327
ciliary stroke of *Mytilus edulis* **114**, 53
circular flume **112**, 1
citrus **109**, 303
city buildings **109**, 147
clarification **112**, 315
clay **113**, 115
clay target shooting **116**, 535
climate **116**, 389
climate change **116**, 33, 311, 403
climatology **112**, 107
cluster analysis **111**, 19; **113**, 241
coagulation **113**, 43
coal fly ash **110**, 421; **111**, 271; **113**, 261
coastal zones **114**, 95
cobalt **116**, 523
Cobalt-60 **114**, 303
cokriging **116**, 605
community structure **110**, 119
competition **116**, 365
complexation **116**, 567
complexation capacity **113**, 385
composition **113**, 175
compost **115**, 395
composted sludge **109**, 207
composting **112**, 229
conifer **116**, 403
conifer swamp **113**, 97
concentration **112**, 163

concentration baselines **111**, 123
$CO\text{-}NO_x$ **109**, 137
conservation tillage **116**, 621
contaminated soils **109**, 219
contamination **109**, 263; **110**, 1; **115**, 347
copper **109**, 41, 163, 327; **110**, 379; **116**, 383, 523
correlation **111**, 399
Corylus avellana **113**, 33
cost evaluation **113**, 43
cow's milk **112**, 133
Cr (II) **112**, 389
Cr (III) adsorption **113**, 371
Cr (VI) **112**, 389
critical levels **116**, 199, 273, 323
critical loads **109**, 101, 357
crown condition **116**, 351, 371, 389
crown productivity **116**, 351
crude oil **109**, 343
Cu **114**, 95
current-use pesticides **115**, 21
cyanate **109**, 67
cyanogen chloride **109**, 67

D
2,4-D **111**, 75
Daphnia magna **111**, 327
Dargall Lane **110**, 239
dark respiration **116**, 549
DDT **110**, 57
deficiency **116**, 383
degradation **115**, 279
dendroanalysis **111**, 215
dendrochemistry **111**, 89
denitrification **111**, 171
density **112**, 85
deposition **109**, 357, 407; **111**, 377; **112**, 1; **113**, 357; **115**, 5, 21, 167, 245
desorption **111**, 75; **113**, 115, 319, 371
detection **114**, 85
deterioration of carbonate stone **114**, 1
diffusion **116**, 567
diffusion coefficient **114**, 347
dispersion **112**, 171
dissolution **115**, 279
dissolved methane **115**, 525
dissolved organic carbon **110**, 273; **113**, 273
dissolved organic matter **113**, 385
distillery effluent **113**, 133
disturbance **112**, 407
diversity **116**, 135, 639
DOC **114**, 199
DOC fractionation **114**, 199
DOM **114**, 199
DON **114**, 199
drift **115**, 183
drinking water **111**, 385; **114**, 67
drip **116**, 605
drought stress **116**, 235
dry deposition **109**, 237; **115**, 445
dry deposition velocity **109**, 237
dry matter yield **112**, 163
dust deposition **112**, 217
dye sorption **114**, 423

E
ecological risk analysis **116**, 199
ecosystem **116**, 255
ecotoxicology **109**, 67; **115**, 71
